Nextech's **Work™** Benching system is designed to be the best fit for a variety of applications with durability in mind.

Our benches are purpose built to manage computer and IT equipment with their associated cabling at each station and provide a clean look.

Whether your emphasis is to improve performance and profitability, maximize your floor space and monitoring effectiveness, or to simply integrate new technology into a standard product, Nextech Corporation can help you with its unmatched experience and knowledge.

This Bench shows elevated plexiglass divider panels and an acrylic panel leg insert.

End & center leg inserts can be laminate, veneer, or whatever you can envision.

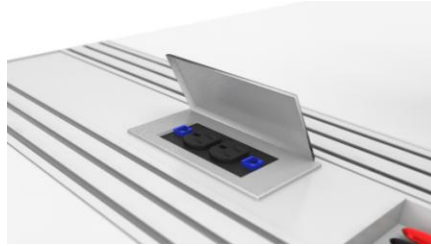

Fabric-wrapped divider panels are just one of the many options you can specify for your benching system.

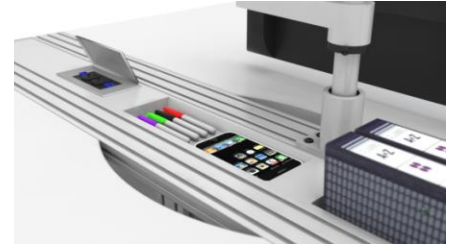

# Center Well Options

All standard options are shown here and are compatible with our benching systems. We can also customize any option to suit your needs.

## Power / Data Unit

Available with 2 power  
& 2 data outlets

## Shallow Storage

Keep pens off the worktop

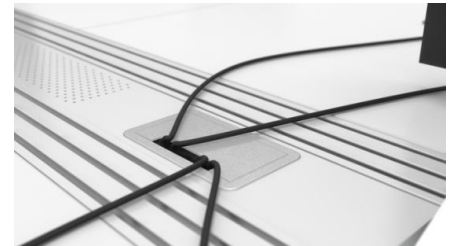

## Deep Storage

Perfect for binders

## Perforated In-Fill

Decorative and effective  
at directing heat

## Brush Grommet

Nextech offers many worksurface solutions. From cable drops to polyform nosings, to custom shapes and cutouts, Nextech does it all.

Straight Worksurface  
With Polyform Nosing,  
Up To 3 Rear Wire Drops

Straight Worksurface  
With Polyform Nosing  
& Body-Well

Nextech offers a full line of nosing options for today's ergonomic-focused environment. We also offer a full line of custom wood nosings and shapes for almost any application.

Our benching systems are equipped with a sliding worktop complete with an innovative locking system. The sliding top allows access to the data & electric cabling in the wire tray below.

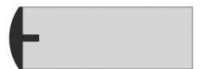

**Polyform "Ovoid" Nosing**  
Used In Most Straight Applications

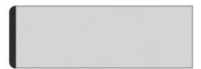

**Polyform "Uni-Arc" Nosing**  
Used With Body-Wells & Other  
Custom Curves

**PVC "T-Mold" Nosing**  
Used With Straight  
& Most Curved Applications

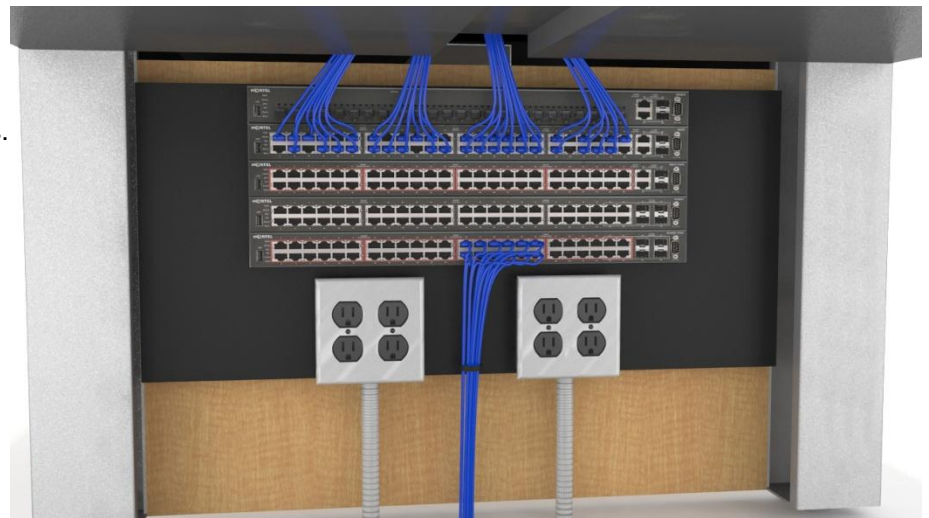

**PVC 3mm Nosing**  
Used With Almost All Applications  
Available In Wood Or PVC

Nextech's benching system can accommodate any EIA standard or custom rack-mounted equipment in equipment counters or desk frames. Custom solutions for wiring and cooling are available as well.

We can customize mounting options for power and data access. Efficient cable management provides better cooling, and is more space-effective.

Center legs can have optional removable panels for even more power and data options. Power and data are brought in from the floor through the center leg here.
